# INDEX TO 1969 ARTICLES IN WELDING DESIGN & FABRICATION

| | FEATURE ARTICLES | PAGE |
|---|---|---|
| DECEMBER | Welded stainless tubing stars in galaxy | 53 |
| | New insight into weld cracking | 56 |
| | Ship grows 80 feet with body transplant | 60 |
| | Mig with a twist is terrific | 64 |
| | Better contacts with iso-brazing | 66 |
| | Building power: switchgear and cored wire | 68 |
| NOVEMBER | Industry Report: Earthmoving equipment | 68 |
| | Evolution of an industry | 71 |
| | How zero, zero defects? | 74 |
| | Metalworking: fashioning steel | 78 |
| | Welding works wonders | 81 |
| | Scraper alley | 85 |
| | Tools and dies and flames | 90 |
| | Welding beryllium: Part 2 | 94 |
| | Beating the heat | 100 |
| OCTOBER | Welding research goes on stream | 65 |
| | Moly's role in pressure vessels | 68 |
| | Brazing beryllium: Part 1 | 74 |
| | An easy switch, steel to aluminum | 80 |
| | Brazed copper keeps rocket engines cool | 84 |
| | Designers show their welding muscle | 86 |
| | Small welding shop: Big producer | 90 |
| SEPTEMBER | Gas shields for arc welds | 59 |
| | Lift truck speeds earthmover welding | 62 |
| | Welding with shockwaves and induction heat | 66 |
| | NDT: Zero defects to the moon | 68 |
| | The whats and whys of stress relieving | 72 |
| | Stainless steel cladding with a twist | 76 |
| | Electron beam welds at Parker Hannifin | 78 |
| | Welding equipment that pays for itself | 80 |
| | Soldering joints of stainless steel | 82 |

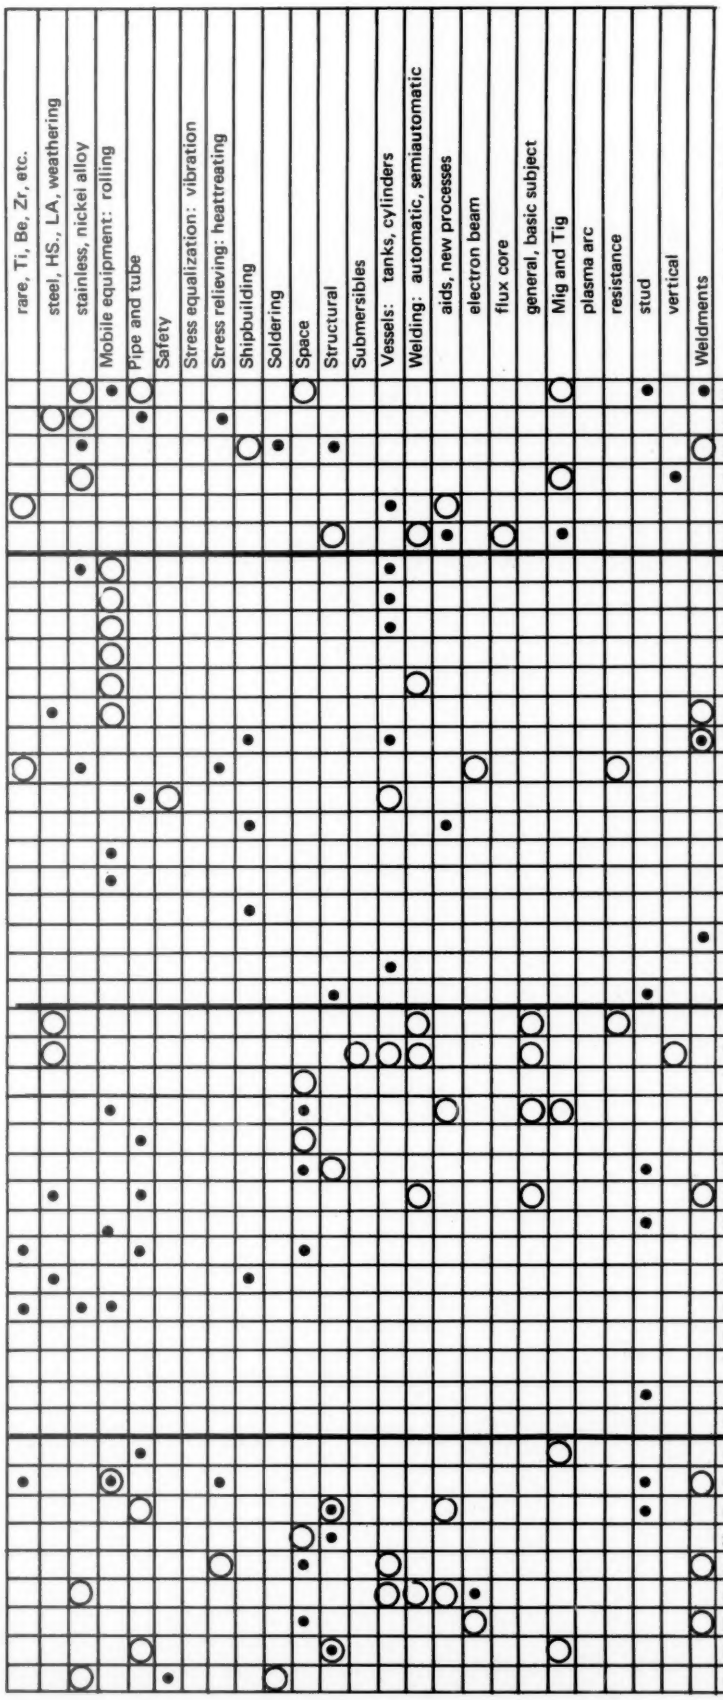
## HOW TO USE THE WD&F SUBJECT INDEX

The subject matter for the titles on the right and left are indicated in the center. For feature articles the symbol ○ is used. For Welding At Work the symbol ● is used. Where both happen to cover the same subject, a combination of the symbols ( ◉ ) is used. Group the subjects opposite the title to get the article content.



| WELDING AT WORK | PAGE | |
|---|---|---|
| Studs replace throughbolts | 22 | DECEMBER |
| Speedy stress relief | 24 | |
| Soldering joints of stainless steel | 24 | |
| What's up in vertical welding | 26 | |
| Plant ahoy! | 33 | |
| Make your point with sodium nitrate | 35 | |
| One fractionating column, indivisible | 36 | NOVEMBER |
| New curving machine cuts part cost | 36 | |
| Copper-clad steel is Linac's security blanket | 41 | |
| The singular surfacing saga of a screw blade | 43 | |
| Flamespraying molds prevents defects | 46 | |
| If it's welded it's got to be beautiful | 46 | |
| Welding torch applies finishing touch | 47 | |
| Let your fingers do the heating | 48 | |
| You can barely see the brazer for the trees | 48 | |
| Weld rejections gone with chemical prep | 51 | |
| New role for aluminum | 53 | |
| Welded guts of all-aluminum transit car | 54 | |
| Shipbuilder automates | 56 | |
| Magnets replace muscles | 58 | |
| Backing flux cuts costs | 58 | |
| Stud welding cuts production costs | 60 | |
| Flamespraying does a better job for less | 20 | OCTOBER |
| Welded dust collector like Mama's Hoover | 22 | |
| Testing gage sees inside coatings | 23 | |
| Plane-Mate of the Year: Hops all over airport | 23 | |
| 11-ft. diameter pipe for nuclear power plant | 27 | |
| Welded fasteners help bring Apollo home | 29 | |
| Power line poles built to last | 30 | |
| Studs replace bolts on push-type lift trucks | 33 | |
| X-raying exotics | 33 | |
| Steel reinforces hull for icebreaking | 35 | |
| Experimental vehicle ready for races | 37 | |
| More savings from hardsurfacing | 37 | |
| The all-aluminum 100-foot crewboat Shenandoah | 38 | |
| Welded fasteners secure pay phones | 38 | |
| Cut finishing costs with masking tape | 39 | |
| Clamps and cut-offs slash production costs | 26 | SEPTEMBER |
| General Electric makes big splash at Bath | 28 | |
| Elevator renovators whisper with welding | 33 | |
| Shapiro and Plofker: A tough act to follow | 35 | |
| Aluminum on the moon | 37 | |
| Not too many contract shops own one of these | 39 | |
| New lease on life for jet engine parts | 39 | |
| Welding cuts costs on Government dam | 40 | |
| Great for building morale: fume exhausts | 40 | |

| WELDING AT WORK | PAGE | |
|---|---|---|
| Laser cutting slashes production costs | 40 | SEPTEMBER |
| This all-welded big steel cylinder | 41 | |
| $250 investment saves firm $12,000 a year | 41 | |
| Jumbo heat treatment for jumbo jet airport | 41 | |
| Not much bread for this toaster | 43 | |
| Flamespraying: red hot bonus baby | 34 | AUGUST |
| Getting it shipped was the hard part | 34 | |
| And yet another for New York | 38 | |
| Stainless brazing salvages huge valves | 40 | |
| Inshore work for offshore drilling | 42 | |
| Ford frames and the fantastic fusion machine | 42 | |
| All-aluminum silo for polypropylene | 51 | |
| Harbinger enshrined | 51 | |
| Each cantilever tips the scales at 11 tons | 53 | |
| Tooth saved from extraction | 53 | |
| Could be the largest ever hardsurfaced | 55 | |
| Cold outside, supercold inside | 56 | |
| Of grillages, crawlers, and columns | 26 | JULY |
| Move in, stress relieve, move out in five days | 29 | |
| Closed circuit TV monitors manufacturing | 29 | |
| It's the first large commercial application | 32 | |
| Big savings from new welding techniques | 32 | |
| Pipeline will meet increased demands for gas | 36 | |
| Section by section a casing takes shape | 38 | |
| Extrusions better in this operation | 38 | |
| United hangar revisited | 42 | |
| All-aluminum transport, first of its kind | 42 | |
| Steel trees blossom at World Trade Center | 24 | JUNE |
| Hardsurfacing cuts maintenance costs | 26 | |
| Welded studs anchor steel in concrete | 28 | |
| All-welded autoclave gets special attention | 28 | |
| If the bar offends thee, cut it off | 30 | |
| More mana from outer space | 30 | |
| Hydraulic hook-up automates hydrostatic test | 32 | |
| Nothing but welded steel pipe | 32 | |
| Nickel alloy vessel succeeds without heattreat | 34 | |
| EB welding critical to hydrofoil success | 35 | |
| Modern techniques repair antique | 36 | |
| Avondale revisited | 38 | |
| Mig plows through work at Florida firm | 32 | MAY |
| Switch to new torch cuts production costs | 32 | |
| No stick work on this job | 36 | |
| New application for hydrostatic pressure | 36 | |
| Stainless steel laboratory on wheels | 38 | |
| Luxury liner is all-aluminum | 42 | |
| Cost of installation cut 75 percent | 42 | |
| From Milan, Italy to Shreveport, Louisiana | 45 | |
| 47 of these are now operational | 46 | |

| WELDING AT WORK | PAGE | |
|---|---|---|
| Dredge features high strength steel ladder | 34 | APRIL |
| All-aluminum shrimp boat is a coming | 36 | |
| State OK's HF welded pipe for road use | 39 | |
| $20 repair job keeps big machine humming | 40 | |
| Operator has a barrel of fun | 42 | |
| Now pinpoint leaks in buried pipeline | 42 | |
| On-site fabrication: first for nuclear reactor | 48 | |
| Instant drawing retrieval at Westinghouse | 50 | |
| Steel ferryboat for Alaskan service | 50 | |
| Aluminum tank for liquified natural gas | 58 | |
| EB welder joins 3 parts at once | 58 | |
| New brazing method cuts fabricating costs | 30 | MARCH |
| New asbestos is better than best | 30 | |
| Five hour repair saves 10 days in port | 33 | |
| The newest for the most exacting | 34 | |
| A touch of the torch is what it takes | 38 | |
| High-performance alloys bolster moon rocket | 38 | |
| Fume exhausts rescue workers from the blahs | 42 | |
| Signs of progress: USS steel triangle | 42 | |
| Pulls, squeezes I beam rings | 44 | |
| Steel column shells grace credit building | 46 | |
| Stud welding on the line for sixty-nine | 46 | |
| X-rays with unit from Rising Sun | 46 | |
| EB welding seals instrument component | 47 | |
| 100% inspection of aluminum heat exchanger | 28 | FEBRUARY |
| Hardsurfacing saves induction fan liners | 28 | |
| Aluminum tanker designed specifically for LNG | 30 | |
| Reactor gets special oil treatment | 32 | |
| Birchbark rendered in 16-gage mild steel | 32 | |
| Faster than a speeding bullet | 34 | |
| Progress report: McCormick Place | 34 | |
| Now it can be told | 36 | |
| EB speeds automobile production | 36 | |
| Japanese firm oriented to use of hardsurfacing | 38 | |
| Machine welds 3 studs inside a can | 40 | |
| Supporting steel is on the outside | 47 | |
| Dissimilar metals EB welded | 47 | |
| Close control of welding gets best results | 48 | |
| High strength all welded hulls for cargo ship | 22 | JANUARY |
| New Mohawk trap kind to Brother Beaver | 26 | |
| Pressure vessel for Navy tests | 26 | |
| String of cars, each a mobile warehouse | 28 | |
| New framing system is cost breakthrough | 30 | |
| Plasma shape-cuts aluminum at 100 ipm | 31 | |
| Semiautomatic speeds welding of turbine parts | 31 | |
